Easy-to-use DocActionII

Users can scan to their PC with the SmartOffice PS186 by simply pressing a button. DocAction II enables users to create 9 different scanning jobs, including the scanning configuration and saving destinations. The easy-to-use interface is very understandable and has full-function settings.

Saving to FTP

The PS186 allows users upload their scanned files to FTP server, FTP is one of the most common forms of file storing method, saving the scanned document directly to FTP helps user sharing their files more convenient and effective.

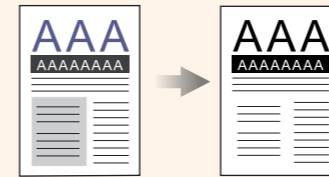

Barcode Scan

The PS186 give the user the most convenient way to scan with barcode document, users can set the barcode number as the file name, which allows you to manage file more convenient and efficient, you can search the important document or shipping letter without open the file one-by-one.

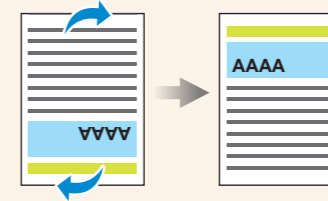

1 Auto Threshold

Automatically threshold the current image into a binary black and white image.

2 Auto Rotate

Automatically rotates document based on the contents of the document.

3 Auto Crop & Deskew

Automatically straightens and crops image to the documents actual size.

4 Character enhancement

Choose this function can increase the contrast, especially on character, in order to clarify the words.

5 Punch hole removal

Documents that are on file usually have punch holes for the easier binding purpose. When scanning these type of files, the scanner will detect the hole leaving black dot over places where the punch hole is in place on the digitalized document.

6 Blank Page Removal Automatically removes blank pages without manual editing.

Fast duplex scanning at speeds up to 25 pages per minute in Grayscale mode.

Digitize paper business cards into easily-managed and sorted contacts, and turn your business cards into information.

Scans embossed rigid cards such as ID cards, insurance cards, drivers licenses and credit cards up to 1.2mm. Perfect for vertical applications such as healthcare, pharmacy, accounting, hospitality, etc.

Save paper documents as searchable PDFs at the touch of a button and find your information faster.

FTP is one of the most common forms of file storing method, the scanner can save and upload the images and files directly to FTP.
